👤 Profile Summary

Self-taught and highly motivated junior developer with hands-on experience in building small desktop applications, console systems, and simple games.
Skilled in C#, .Net Framework, C++, OOP, and functional programming principles.
Focused on writing clean, maintainable, and efficient code.
Seeking an opportunity to grow inside a professional environment and contribute to real-world projects.

👜 Experience

Freelance / Personal Projects

2023 – Present

Developing small applications using C#, .Net Framework, C++, Html, Css and web technologies.
Applying OOP and functional programming concepts in real projects.
Improving code quality, debugging, and application structure.

🧠 Technical Skills

Programming Languages

C#, C++, HTML, CSS

Frameworks

.NET Framework, Windows Forms

Programming Paradigms

OOP, Functional Programming

Tools

Visual Studio, Git, GitHub

Concepts

UI/UX basics, debugging, problem solving, code structure, algorithms

🎓 Education

Self-Taught Developer

Learning through online resources, documentation, and building practical projects.

Languages

Arabic

Native

English

Intermediate

French

Basic

Projects

Restaurant Pizza Order Management System, C# .Net Framework — Windows Forms

Desktop application for managing pizza orders.

Includes dynamic order calculation, interactive UI, and error reduction.

Built using Windows Forms and OOP structure.

Project Link: <https://github.com/RahimCoding/Cs-mini-projects/tree/main/PizzaOrder>

Tic Tac Toe Game, C# — Windows Forms or Console

Developed a complete Tic Tac Toe game using clean logic and structured code.

Demonstrates UI interaction / grid handling / game state management.

Implemented using OOP and functional logic.

Project Link: <https://github.com/RahimCoding/Cs-mini-projects/tree/main/TicTacToe>

Bank System, C++ — Console Application

Console program simulating a banking system.

Features accounts, deposits, withdrawals, and transaction logs.

Emphasizes OOP design and data handling.

Project Link: <https://github.com/RahimCoding/Cpp-mini-projects/tree/main/BankV2>

ATM System, C++ — Console Application

ATM simulation including PIN verification and account operations.

Strong focus on functional and structured programming.

Project Link: <https://github.com/RahimCoding/Cpp-mini-projects/tree/main/ATMSystem>

Personal Portfolio Website, HTML & CSS

Fully responsive personal website to showcase your work.

Clean, modern design with project cards and contact links.

Project Link: <https://github.com/RahimCoding/Portfolio>

Soft Skills

- Fast learner
- Creativity
- Problem solving
- Attention to detail
